

Good oral hygiene is essential to good health. To safeguard your health, Cavex offers effective solutions that promote health for everyone and products that seamlessly fit the needs of modern practices and contemporary patients around the world.

CAVEX Rush Brush

Cavex Rush Brushes are ready-to-use. Open the hygienic wrapping and start brushing. No toothpaste is needed because the brushes are coated with fresh-tasting toothpaste.

The small brush heads reach all parts of the mouth and the soft, round bristles are safe for the gums. In short, a toothbrush as you would want your toothbrush at home to be.

CAVEX *Rush Brush*

- **Pre-impregnated with toothpaste**

Thanks to revolutionary technology, the Cavex Rush Brushes are invisibly coated with toothpaste. The uniqueness of this technology is that, although toothpaste is already applied to the brush, the Rush Brush retains its fresh and attractive appearance.

- **Hygienically wrapped**

- **Fresh taste**

The Cavex Rush Brush is manufactured with great care and hygienically wrapped in sealable plastic bags. This maintains the high quality of the Cavex Rush Brush and makes it suitable for use anytime and anywhere. The Cavex Rush Brush has a fresh, minty taste that is not too predominant.

- **Safe, soft brush**

The Cavex Rush Brush has a small "round" brush head that can reach even the most difficult parts of the mouth quite easily. The soft bristles and the rounded bristle tips make the brush extremely gentle on gums and sensitive teeth. This makes the Cavex Rush Brush extremely suitable for both adults and children.
